

Share your plants

Are you overwhelmed with seedlings after the **Big Seed Sow**? Why not share your plants with your community or neighbourhood!

We've collaborated with **Project Grow** to bring you these handy plant tag templates, so that you can pass on your plants and give their new owners all the tips and information needed to nurture them. However you choose to share your plants, let us know when you **contribute to the Grow With It map**, by using the QR code on the right.

Hole punch your tag here and attach a string to your pot or plant

Write your plant name here, or use the pre-filled tags for our selection of **#RHSGrowWithIt** seeds

Top tip!

Why not print your tags onto coloured paper or card to draw attention to the plants for their new owners?

Tick / circle the relevant care instructions that apply to your plant
