Corrections to the Register and Checklist	page 6
List of raisers, registrants and introducers	page 7

The following list contains the names of *Dianthus* cultivars added to the International Dianthus Register between 1 July 2016 and 31 December 2017.

Raisers and introducers of new cultivars are urged to ensure that the names of all their plants have been registered and are reminded that registration should take place before a plant is released or the name is mentioned in print. Registration concerns all named cultivars. The forms to register a new name can be obtained from the International Dianthus Registrar, at the address below. A certificate of registration will be issued on request. There is no fee for this service. The form may also be downloaded from the RHS website at

[rhs.org.uk/plants/pdfs/plant-registration-forms/dianthus-name-registration](https://rhs.org.uk/plants/pdfs/plant-registration-forms/dianthus-name-registration)

The format of entries follows the pattern adopted in the *The International Dianthus Register & Checklist 2016* (third edition, RHS 2016) compiled by Alan C. Leslie. Following the classification and the name of each new cultivar is a statement regarding parentage or origin. The names of those involved in the raising, introduction and registration of the plant are then listed, together with the relevant dates. It may be helpful here to repeat the abbreviations that are employed in the text:

- (b) border carnation
- (c) carnation
- cv. cultivar
- G grown to first flower by...
- Gp Group
- H hybridised by...
- I introduced by...
- L listed by...
- (m) malmaison carnation
- N named by...
- (p) pink
- (p,a) annual pink or plant usually grown as an annual
- (pf) perpetual carnation
- (pt) pot carnation
- R raised by...
- REG registrant
- S selected by...
- (s) seed parent

Perpetual carnations are listed, where known, as sprays or standards. The use of the latter should not be confused with the citation of nomenclatural standards which refer to the individual herbarium specimen or image (slides, prints etc.) which have been selected as the definitive point of reference should any doubt arise about the plant to which the name concerned should apply.

Colour references such as 128D are to the *RHS Colour Chart* (1966, 1986, 1995, 2001, 2007, 2015), those such as 730/3 refer to the *Horticultural Colour Chart* (1941). The descriptions are as full and consistent as information provided by the registrant and other sources allow.

Any additional material or corrections would be welcomed by the International Registrar.
