Fls fully double, 50mm wide, good domed shape with a closed centre, deep pink self; margins minutely toothed. Lvs blue-green. Stems 0.65m (under glass). Vigorous, though rather tall; flowering early. Nomenclatural standard: colour print provided by registrant

(WSY0051738). Etymology: the Sutton prefix is derived from the raiser's locality and it is otherwise named for the deceased granddaughter of his partner. First published in Yorkshire Carnation Society's plant list 2003.

(p) '**Sutton Lorens Amour**'
cv. 'Marina Johnson' (s) X unnamed seedling. **H:** M.A. Newby (2002), **G:** M.A. Newby (2003), **N:** M.A. Newby (2003), **REG:** M.A. Newby (2004). Fls fully double (but opening out flat with an open centre and with an occasional short petaloid), 45mm wide, pink ground, with a very pale base to each petal limb which is separated from the distal part of petal by a band of light crimson (which may be a continuous band (but not reaching to edges) or a discontinuous set of marks); margins minutely toothed. Lvs bluish green, very similar to 'Marina Johnson'. Stems 0.55m (under glass), straight; bushy habit. Nomenclatural standard: colour print provided by registrant (WSY0051737). Etymology: the Sutton prefix is derived from the raiser's locality and it is otherwise named for a granddaughter.

(p) '**Sutton Maggie May**'
cv. 'Marina Johnson' (s) X unnamed seedling. **H:** M.A. Newby (2001), **G:** M.A. Newby (2002), **N:** M.A. Newby (2002), **I:** M.A. Newby (2003), **REG:** M.A. Newby (2004). Fls fully double, 40mm wide, with rather cupped petals and closed centre, pure white ground, with faintest of pink traces around the centre; margins entire to minutely toothed; scented. Lvs grey-green. Stems 0.6m (under glass). Very vigorous. Syn: 'Maggie May'. Nomenclatural standard: colour print provided by registrant (WSY0051736). Etymology: the Sutton prefix is derived from the raiser's locality and "Maggie" is the name of a friend. First published in Yorkshire Carnation Society's plant list 2003.

(p) '**Sutton Mayfair**'
cv. 'Sutton Twilight Shadow' (s) X unnamed seedling. **H:** M.A. Newby (2006), **G:** M.A. Newby (2007), **N:** M.A. Newby (2007), **I:** M.A. Newby (2007), **REG:** M.A. Newby (2008). Fls fully double, 48mm wide, light lavender self, fading slightly at the edges; margins entire to very shallowly toothed. Lvs grey-green. Stems very erect, 50cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100975). Etymology: the Sutton prefix is derived from the raiser's

locality, the remainder of the epithet is 'a posh name...for a very posh-looking flower'.

(p) '**Sutton Melissa Haywood**'
cv. 'Mary Richardson' (s) X unnamed seedling. **H:** M.A. Newby (2004), **G:** M.A. Newby (2005), **N:** M.A. Newby (2006), **I:** M.A. Newby, **REG:** M.A. Newby (2008). Fls fully double (of good rounded form), 40mm wide, pink ground, with flecks and spots of dark pink, as the flower ages and stigmas emerge the colours become pale lavender and cream; margins shallowly toothed. Lvs grey-green, rather thin. Stems 45cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100976). Etymology: the Sutton prefix is derived from the raiser's locality and it is otherwise named after the then girl friend (now wife) of the raiser's managing director.

(p) '**Sutton Molly Truswell**'
cv. 'Marina Johnson' (s) X unnamed seedling. **H:** M.A. Newby (2001), **G:** M.A. Newby (2002), **N:** M.A. Newby (2002), **REG:** M.A. Newby (2004). Fls fully double, 50mm wide, of good form and shape (the petals very broad, hardly waved, opening fairly flat but with tight centre), deep fuchsia pink self; margins entire. Lvs blue-green, tending to be clustered at base of stems. Plant very bushy at base, with numerous stems and flowers; stems 0.55m (under glass). Nomenclatural standard: colour print provided by registrant (WSY0051740). Etymology: the Sutton prefix is derived from the raiser's locality and is otherwise named for an aunt. First published in Yorkshire Carnation Society's plant list 2003.

(p) '**Sutton Nile Sunset**'
cv. Unnamed seedling (s) X unnamed seedling. **H:** M.A. Newby (2005), **G:** M.A. Newby (2006), **N:** M.A. Newby (2006), **I:** M.A. Newby (2006), **REG:** M.A. Newby (2008). Fls fully double, 48mm wide, light salmon pink ground, with a bright orangy red eye (more or less even in depth, but with uneven margins, the outer margin with a grey line around edge as the ground fades to a pale salmony pink); petal margins sharply and shallowly toothed. Lvs grey-green, broader than most. Stems 50cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100977). Etymology: the Sutton prefix is derived from the raiser's locality and the colour reminded the

raiser of sitting on deck with a drink watching the sunset on a Nile cruise.

(p) '**Sutton Obsession**'
cv. 'Sutton Indian Silk' (s) X unnamed seedling. **H:** M.A. Newby (2008), **G:** M.A. Newby (2009), **N:** M.A. Newby (2010), **I:** M.A. Newby (2009), **REG:** M.A. Newby (2010). Fls fully double, 50mm wide, peachy pink self; margins entire to very shallowly toothed. Lvs blue-green. Stems 0.55m (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0119369). Etymology: the Sutton prefix is derived from the raiser's locality, the remainder 'an apt name for a beautiful flower' and reflecting the raiser's enthusiasm for this group of plants.

(p) '**Sutton Old English**'
cv. Unnamed seedling X unnamed seedling. **H:** M.A. Newby (2002), **G:** M.A. Newby (2003), **N:** M.A. Newby (2004), **I:** M.A. Newby (2004), **REG:** M.A. Newby (2004). Fls fully double, 55mm wide, with a closed centre and good circular form, pink self; margins entire or minutely toothed. Lvs grey-green, wide and thick, resembling those of a pf carnation. Stems c.0.80m (under glass), tall and thick. A difficult plant to grow and may have pf or border carnation in its ancestry. Nomenclatural standard: colour print provided by registrant (WSY0051741). Etymology: the Sutton prefix is derived from the raiser's locality and the flowers are said to open looking like an 'old English rose'.

(p) '**Sutton Olivia Newby**'
cv. 'Marina Johnson' (s) X unnamed seedling. **H:** M.A. Newby (2001), **G:** M.A. Newby (2002), **N:** M.A. Newby (2002), **I:** M.A. Newby (2002), **REG:** M.A. Newby (2003). Fls fully double, 45mm wide, pure white self with rather smooth petals; margins almost entire; strongly scented. Lvs grey. Stems 50cm (under glass). Fls with a perfectly rounded outline (seen from above). Syn: 'Olivia Newby'. First published in Yorkshire Carnation Society plant list, August 2003. Etymology: combination of registrant's locality and the name of his late mother.

(p) '**Sutton Pamela Anne**'
cv. 'Sutton Maggie May' (s) X unnamed seedling. **H:** M.A. Newby (2005), **G:** M.A. Newby (2006), **N:** M.A. Newby (2006), **I:** M.A. Newby (2006), **REG:** M.A. Newby (2008). Fls semi-double, 45mm wide,

white ground, with a large burgundy eye (the eye very deep, outer margin well-defined but very uneven, inner margin diffuse), surrounding a slightly greenish throat; margins shallowly toothed; not scented. Lvs more green than grey. Stems 46cm (under glass); bushy habit. Nomenclatural standard: colour print provided by the registrant (WSY0100979). Etymology: the Sutton prefix is derived from the raiser's locality and it is otherwise named for the raiser's partner.

(p) '**Sutton Pamela Flett Supreme**'
cv. Sport from 'Pamela Flett'. **N:** M.A. Newby (2004), **I:** M.A. Newby (2004), **REG:** M.A. Newby (2004). Fls fully double, 50mm wide, of good rounded form and with a closed centre, pale pink ground, with very dense, even markings of deep salmon; margins entire to minutely toothed; not scented. Lvs grey-green, the same as parent. Stems c.0.60m (under glass), robust. Bushy habit. Syn: 'Pamela Flett Supreme'. First propagated (2003): M.A. Newby. Nomenclatural standard: colour print provided by registrant (WSY0051731). Etymology: the Sutton prefix is derived from the raiser's locality, the remainder in part from the parent cultivar.

(p) '**Sutton Pamela Richardson**'
cv. 'Sutton Indian Silk' (s) X unnamed seedling. **H:** M.A. Newby (2007), **G:** M.A. Newby (2008), **N:** M.A. Newby (2008), **I:** M.A. Newby (2008), **REG:** M.A. Newby (2010). Fls fully double (although with an open centre), 45mm wide, pure white self; margins very shallowly toothed; scented. Lvs blue-green. Stems 45cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0119372). Etymology: the Sutton prefix is derived from the raiser's locality, whilst "Pamela Richardson" is the maiden name of his partner.

(p) '**Sutton Pamela's Choice**'
cv. 'Sutton Maggie May' (s) X unnamed seedling. **H:** M.A. Newby (2006), **G:** M.A. Newby (2007), **N:** M.A. Newby (2007), **I:** M.A. Newby (2007), **REG:** M.A. Newby (2008). Fls semi-double, 48mm wide, white ground, with a purplish magenta eye ring (the eye more or less uniform in depth, with a very shallowly 'toothed' outer margin and a more deeply 'lobed' inner margin); petal margins entire to very shallowly toothed; strongly scented. Lvs grey-green. Stems rather tall and thin, 0.56m (under glass). Nomenclatural standard: colour print provided by the registrant

(WSY0100978). Etymology: the Sutton prefix is derived from the raiser's locality, whilst the plant is the choice of his partner from his 2007 seedlings.

(p) 'Sutton Pathfinder'

cv. 'Sutton Brierley Grace' (s)
X unnamed seedling. **H:** M.A. Newby (2006), **G:** M.A. Newby (2007), **N:** M.A. Newby (2007), **I:** M.A. Newby (2007), **REG:** M.A. Newby (2008). Fls fully double, 46mm wide, pink ground, with a deep crimson eye ring (the eye thickest in centre of each petal, the outer margin bleeding up the veins for a short distance); margins entire to very shallowly toothed. Lvs grey-green. Stems 38cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100980). Etymology: the Sutton prefix is derived from the raiser's locality.

(p) 'Sutton Peter Newby'

cv. 'Sutton Brierley Grace' (s)
X 'Marina Johnson'. **H:** M.A. Newby (2006), **G:** M.A. Newby (2007), **N:** M.A. Newby (2007), **I:** M.A. Newby (2007), **REG:** M.A. Newby (2008). Fls fully double (with some slightly petaloid stamens), 48mm wide, deep pink ground, with a large crimson eye ring (the eye deep, with a shallowly 'toothed' outer margin and a deeply 'lobed' basal margin), surrounding a paler centre; petal margins entire to very shallowly toothed. Lvs grey-green. Stems 40cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100981). Etymology: the Sutton prefix is derived from the raiser's locality and it is otherwise named after his late brother.

(p) 'Sutton Petite Marina'

cv. 'Marina Johnson' (s) X 'Marina Johnson'. **H:** M.A. Newby (2002), **G:** M.A. Newby (2003), **N:** M.A. Newby (2004), **I:** M.A. Newby (2006), **REG:** M.A. Newby (2004). Fls single, 35mm wide, of good rounded form and open centre, flat, pale pink ground, with a broad crimson eye; margins shallowly toothed. Lvs narrow, blue-green. Stems 0.55m (under glass), straight. Bushy-based habit, with many side buds to give plenty of stems. Nomenclatural standard: colour print provided by registrant (WSY0051743). Etymology: the Sutton prefix is derived from the raiser's locality, whilst the plant looks like a smaller, single-flowered version of its parent. First published in Yorkshire Carnation Society's plant list 2004.

(p) 'Sutton Pink'

cv. Parentage unknown. **R:** unknown (pre-1935). Fls semi-double, rose pink. An old cultivar, found in a Lincolnshire garden (UK), pre-1935.

(p) 'Sutton Sarah Tilley'

cv. Unnamed seedling X unnamed seedling. **H:** M.A. Newby (2002), **G:** M.A. Newby (2003), **N:** M.A. Newby (2004), **I:** M.A. Newby (2004), **REG:** M.A. Newby (2004). Fls fully double, 45mm wide, with a more or less closed centre, petals slightly cupped, salmon pink self; margins minutely toothed. Strong, very straight stems to 0.60m (under glass). Compact habit. Nomenclatural standard: colour print provided by registrant (WSY0051735). Etymology: the Sutton prefix is derived from the raiser's locality and is otherwise named for a granddaughter of the raiser. First published in Yorkshire Carnation Society's plant list 2004.

(p) 'Sutton Scarlet O'Hara'

cv. Unnamed seedling X unnamed seedling. **H:** M.A. Newby (2001), **G:** M.A. Newby (2002), **N:** M.A. Newby (2002), **I:** M.A. Newby (2002), **REG:** M.A. Newby (2004). Fls fully double, 45mm wide, with a closed centre, scarlet self or the odd petal showing a fleck of white; margins entire to minutely toothed. Lvs blue-green, slightly paler than normal pinks foliage. Stems 0.65m (under glass). Strong growing, with lots of side buds. Nomenclatural standard: colour print provided by registrant (WSY0051734). Etymology: the Sutton prefix is derived from the raiser's locality, whilst the remainder suggested by the vivid colour; the spelling of "Scarlet" with one 't' is deliberate. First published in Yorkshire Carnation Society's plant list 2004.

(p) 'Sutton Secret Love'

cv. 'Belmont Ruby Wedding' (s)
X 'Sutton Dorothy Deaton'. **H:** M.A. Newby (2002), **G:** M.A. Newby (2003), **N:** M.A. Newby (2003), **I:** M.A. Newby (2003), **REG:** M.A. Newby (2004). Fls fully double, 50mm wide, with a closed centre, very deep purple self; margins entire. Lvs broader than usual, blue-green. Stems 0.6m (under glass), very straight. Strong-growing, with many side buds. Etymology: the Sutton prefix is derived from the raiser's locality, whilst the deep purple colour reckoned to engender 'a sense of mystery about it'. First published in Yorkshire Carnation Society's plant list 2004.

(p) 'Sutton's Freedom'

cv. Parentage unknown. **R:** Sutton & Sons (pre-1933). Fls single, bright rose pink self; sweetly scented. AM 1933. Syn: 'Freedom'.

(p) 'Sutton Symphony'

cv. 'Sutton Old English' (s) X unnamed seedling. **H:** M.A. Newby (2006), **G:** M.A. Newby (2007), **N:** M.A. Newby (2007), **I:** M.A. Newby (2007), **REG:** M.A. Newby (2008). Fls fully double, 42mm wide, very delicate light peach pink self; margins entire to very shallowly toothed. Lvs grey-green. Stems tall, 0.6m (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100982). Etymology: the Sutton prefix is derived from the raiser's locality.

(p) 'Sutton Tequila Rose'

cv. 'Marina Johnson' (s) X unnamed seedling. **H:** M.A. Newby (2004), **G:** M.A. Newby (2005), **N:** M.A. Newby (2006), **I:** M.A. Newby (2006), **REG:** M.A. Newby (2008). Fls semi-double, 45mm wide, deep pink ground, with a fairly narrow, dark red eye ring (the eye rather uneven in depth, with shallowly 'toothed' margins), surrounding a paler centre; petal margins entire to very shallowly toothed; not scented. Lvs broad, grey-green. Stems short, 27cm (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100983). Etymology: the Sutton prefix is derived from the raiser's locality, whilst the colour is reminiscent of some plants seen at the Rui Tequila Hotel in Mexico by the raiser.

(p) 'Sutton Twilight Shadow'

cv. 'Sutton Old English' (s) X unnamed seedling. **H:** M.A. Newby (2004), **G:** M.A. Newby (2005), **N:** M.A. Newby (2006), **I:** M.A. Newby (2006), **REG:** M.A. Newby (2008). Fls fully double (of good rounded, flat form), 40mm wide, light purple self which tends to fade a bit giving it a shadow effect; margins entire to very shallowly toothed. Lvs grey-green. Stems 0.7m (under glass). Nomenclatural standard: colour print provided by the registrant (WSY0100984). Etymology: the Sutton prefix is derived from the raiser's locality. Similar to 'Sutton Amethyst' but with fewer petals.

(b) 'Suwarrow'

cv. Parentage unknown. **R:** Cope (1820). Fls white ground, crimson bizarre.

(p) **'Suwarrow'**
